**RE: Assessment on Activ Executive and Operators Chair Range**

The Occupational Health and Safety Act require seating in the workplace to conform to certain ergonomic criteria.

Based on the compliance with the ergonomic criteria regarding durability, quality, appearance, and ergonomics and after sales service, I have come to the conclusion that the Activ Executive and Operator chair range is one of the best ergonomic office chair range in the market.

I personally have been using the Activ Executive chair for the past year, and have recommended it to numerous of my patients suffering from lower back pain.

I would recommend the Activ Range of chairs to any individual who requires a proper ergonomic chair.

Yours Sincerely,

Dr Paul Birdsey
