ACTIV CHAIR

I am the head of 6 spinal treatment facilities and my staff and I manage pathologies ranging from uncomplicated mechanical back pain to failed back surgery syndrome cases.

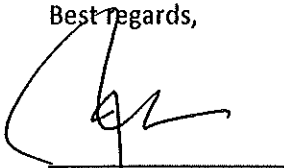

In the course of our inter-disciplinary treatment the expertise of medical Doctors, Physiotherapists, Biokineticists and Occupational Therapists are utilized in conjunction with evidence-based medicine treatment protocols and rehabilitation equipment. We aim at preserving our exceptional treatment outcomes for patients once they have finished the treatment by ensuring optimized ergonomics and posture control both at work, home and at play.

For this reason we requested Karo to provide office chairs of suitable quality and ergonomic adjustability at prices that patients would easily be able to afford. We are very happy with the range of products that they provide as well as the level of service and the professional manner in which business is conducted. I am therefore quite happy to recommend the following:

Karo Activ chair

Any prospective buyer should not complete a purchase of any office seating without at the very least having sampled the products provided by Karo.

Best regards,

Dr JJ Gillau
