

# WELLBACK KNEELING CHAIR

Originally developed by Karo in 1986, the Wellback Kneeling Chair is designed to promote better posture and spinal alignment while sitting. Unlike traditional chairs, it encourages a more open hip angle by tilting the pelvis forward. This helps distribute body weight between the seat and the shins, reducing pressure on the lower back and encouraging a more upright posture.

The Wellback Kneeling Chair allows users to kneel comfortably while maintaining support. This design aims to alleviate discomfort associated with prolonged sitting and can enhance focus and productivity.

## Features:

- 1 Year Warranty
- Weight Rating 120kg
- Sturdy steel frame
- 2 lateral adjustments for seat pad and knee pad
- 3 height adjustments for seat pad and knee pad
- Upholstery fabric specifically selected to be gentle on the skin
- Automotive-grade, high-density moulded foam, for greater comfort and longer life
- Simple assembly
- Lightweight construction (8kg)
- 60mm nylon castors for greater manoeuvrability
- Supplied flat-packed or fully assembled
